

CLAIMS

I claim:

A pack comprising:

an insulated compartment;
 an auxiliary compartment mounted next to said insulated compartment;
 a mount for attaching said pack to another object;
 said auxiliary compartment having
 a receptacle of a size for receiving a telephone handset,
 another receptacle of a size for receiving a wallet, and
 a closure securable in a closed position to conceal the contents of
 said receptacles.

2. The pack of claim 1 wherein said pack has a second mount for inhibiting swaying of said pack relative to the object to which the first mount is attached.
3. The pack of claim 1 wherein said pack includes a see-through pocket mounted externally to said auxiliary compartment of a size to receive a golf ball therein.
4. The pack of claim 1 wherein:
 said pack has a leading panel for placement adjacent to the object to which
 said first mount is attached, a pair of side regions, a trailing region,
 a bottom and a top;
 a see-through pocket is mounted to one of said side regions; and
 said see-through pocket has an access lip having a leading portion and a
 trailing portion, said leading portion having a greater altitudinal
 dimension relative to said pocket than said trailing portion.

5. The pack of claim 1 wherein said pack has a lid, said lid has a handle, and said handle has a reinforced attachment to said lid, whereby, when said lid is closed, said pack can be carried by said lid.

6. The pack of claim 5 wherein said insulated compartment has a substantially impermeable liner, and said liner can be inverted to facilitate washing thereof.

7. The pack of claim 6 wherein said insulating compartment has a thermal transfer medium holder, and said holder is vented.

8. The pack of claim 1 wherein:

said insulated compartment has an opening;

said pack has a lid for closing said opening, said lid forming an upper region of said pack;

said insulated compartment has a substantially impermeable liner attached about said opening; and

said liner can be inverted to facilitate washing thereof.

9. The pack of claim 1 wherein said auxiliary compartment includes a key holder.

10. The pack of claim 9 wherein said key holder includes a lanyard secured within said auxiliary compartment.

11. The pack of claim 1 wherein:

said pack has a leading portion, a trailing region, a pair of side regions, a top region and a bottom region;

said auxiliary compartment is mounted to said trailing region;

one of said side regions has a see-through side pocket, said pocket having a leading edge, a trailing edge and an opening between said leading and trailing edges;

said leading edge being longer than said trailing edge;
 said auxiliary compartment has a see-through vented golf ball pocket
 mounted externally thereto;
 said insulated compartment has an opening having a circumferential lip,
 and a substantially impermeable liner mounted thereto about said
 lip, said liner being invertible to facilitate washing thereof;
 said top region including a lid for closing said opening and said lid has a
 handle attached thereto by reinforced handle attachments.

12. A pack comprising:
 an insulated compartment;
 a first mount for carrying the weight of said pack, located on an upper
 region of said pack for attachment to another object;
 a second mount located on a lower region of said pack for attachment to
 the other object to inhibit swaying of said pack about said first
 mount.
13. The pack of claim 12 wherein said pack is reinforced at the location at which said
 first mount is attached to said pack.
14. The pack of claim 12 wherein said pack is reinforced at the location at which said
 second mount is attached to said pack.
15. The pack of claim 12 wherein said first mount is a quick release hanging mount
 and said second mount is a cinch strap.

16. The pack of claim 12 wherein said pack further comprises:
 a soft shell wall;
 a lower girth reinforcement for carrying loads to said second mount; and

at least one bracing web [oriented to carry loads between a lower portion of said pack and said first mount.]

- 5 17. The pack of claim 12 wherein said pack further comprises an upper girth reinforcement.

- 10 18. The pack of claim 12 wherein said pack further comprises:
a soft shell wall having leading portion, a trailing portion, a pair of side portions, and a bottom portion, said soft shell portion having an opening in said upper region, said opening having a rim;
a lid for closing said opening;

- 15 19. The pack of claim 18 wherein said lid has a carrying handle, is moveable to a closed position, and has a securable closure whereby said pack can be carried by said carrying handle in said closed position.

- 20 20. The pack of claim 18 wherein:
said soft shell wall is an insulating wall and forms the boundary of said insulated compartment; and
said auxiliary compartment is mounted externally of said soft shell wall.

- 25 21. The pack of claim 18 wherein said pack includes a see through pocket located externally on said soft shell wall and has an access opening that is tapered from a tall leading portion to a short trailing portion.

- 30 22. The pack of claim 18 wherein:
said soft shell wall is an insulating wall bounding said insulated compartment;
said insulated compartment has a substantially impermeable liner mounted therein; and

said liner can be inverted to facilitate washing thereof.

23. The pack of claim 18 wherein:

said soft shell wall is an insulating wall and forms the boundary of said insulated compartment;

said auxiliary compartment is mounted externally of said soft shell wall;
said pack includes a see-through pocket located externally on said soft shell wall and has an access opening that is tapered from a tall leading portion to a short trailing portion;

said insulated compartment has a substantially impermeable liner mounted to said rim; and

said liner can be inverted to facilitate washing thereof.

24. A pack for mounting to a golf bag comprising:

an insulated compartment and an auxiliary compartment having a closure for concealing the contents thereof; a first mount for carrying the vertical load of said pack located on an upper region of said pack for attaching said pack to the golf bag;

a second mount located on a lower region of said pack for attaching to the golf bag at a different location than the first mount.
